

EUROPE IS MY FUTURE

Veselin Valov – 9-th grade

Foreign Language School

Pleven, Bulgaria

Why is Europe my future?

Today I am going to tell
you what makes me
think that Europe is my
future.

The European countries

- The European countries are one of the most developed in the world
- Personally, I like the UK and Germany the most because of the culture and I speak English and German, too
- At the end of the day all countries in west Europe are very good arranged in the global economy

The EU is second to none

- When we talk about the EU as many countries is nothing special but if we talk about it as one, then even the most developed countries in the whole world can not be compared with EU.

The EU is unsurpassable

- What that means is that you can basically live in the most developed place in the world and that gives plenty of chances for you to develop. And for me that is the reason to live actually to develop or simple said to be better at what you do.

Higher education in Europe

In order to get a good job later in life I will have to go study somewhere in Europe

The EU is safe

The EU is safe for many reasons, for example, the health system is much better, than the one in the USA.

The EU is safe

- The EU is far from being a warzone and I think that exactly the EU can fix the situations in the middle east and Africa but this is another thing to talk about, maybe next time...

The EU is safe

- There are no real conflicts between the countries in the EU like those in other parts of the world. We are actually the biggest and strongest union in the world.

A white rectangular box containing the text "Together We're Strong" written in a black, elegant, cursive calligraphic font. The words are stacked vertically: "Together" on the top line, "We're" on the second line, and "Strong" on the third line. The letters are thick and have decorative flourishes, particularly at the end of the word "Strong".

The culture of the continent

- The culture in Europe is special in its own way. There are so many things in Europe that I have not seen and this reason is enough for me to say that Europe is in my future.

Europe is closest to me

- When I have to go to a university or even if I choose to live in another country I will 100% choose a country in Europe because it will be closer to my home town, family and friends

Thank you
for your
attention!
